Frequently Asked Questions

Upgrading to Windows 11

Introduction

Windows 11 is now available for upgrade for the Windows 10 machines.

Our recommendations

Currently, we do not recommend upgrading to Windows 11. We are in the process of testing our programs in Windows 11, but the BSI products have not yet been thoroughly tested to know how they run and what problems they may have. Please be patient. We will update this FAQ once we have more information.
