Scheduled Events - how to add or create scheduled events

The following image has step

by step instructions on how add a macro to a new or existing scheduled event.

1. Click the Async drop down menu
2. Select Scheduled Events
3. Click File and select Open to choose an existing scheduled event to add to OR click New to create a new scheduled event
4. Open Event Builder to create the desired macro on the Macro tab or select a cart from the Audio tab
5. Use the "Drag from Icon" to drag the macro or cart from Event Builder and drop it in to the Scheduled Events window
6. Highlight the event you just dropped in to the Scheduled Event window and click the calendar icon to choose the day(s) of the week for it run
7. Click the stop watch icon and set the time of day you want it to run
8. Click the save icon to save the changes to the scheduled event
9. Set the Startup Scheduled Events to the scheduled event you want active when Simian starts & the Current Scheduled Events for what you want currently active
