SoundHound does not automatically open when Simian runs
This can happen if the SoundHound executable file itself is set to run as administrator.

To fix this:

1. Close Simian.
2. Navigate to the C:\BSI32 folder.
3. Look in that folder for SndHound.exe
4. Right-click on SndHound.exe and then left-click on "Properties"
5. Left-click on the "Compatibility" tab
6. In the "Settings" section, look to see if the option to "Run this program as administrator" is checked **(NOTE: The ability to uncheck this option may be grayed out).**
7. To uncheck this option, left-click on the "Change settings for all users" button.
8. In the next window, uncheck the "Run this program as administrator" check box and left-click the Apply and OK button.
9. Left click the Apply and OK buttons to close this window.

SoundHound should now automatically run when Simian is opened.
